

Leesburg Town Plan 2005

Green Infrastructure Policy Map

This map shows the minimum area of the green infrastructure based on major parks and the general location of water resources. The extent of the environmentally sensitive areas must be established on a site-by-site basis, where field surveys can precisely establish stream corridor buffers, floodplains, wetlands, and steep slopes.

Major Open Space identifies properties ten acres or larger, as explained in the text. Additional properties may be designated from time to time.

- Stream Corridors
- Major Open Space
- Watersheds

- Roads
- Urban Growth Area
- Leesburg Boundary
- Water Features
